WiTi Wireless Trailer Interface With Anti-theft System

Buy Now \$499.00

WiTi includes a revolutionary anti-theft system and is the only anti-theft system designed specifically for caravans and trailers fitted with electric brakes.

If a caravan / trailer is hitched or moved slightly whilst the anti-theft is active then WiTi immediately applies the brakes, flashes all the lights and sounds an alarm.

Features –

- Designed and developed in Australia.
- WiTi detected movements via a highly sensitive gyroscope.
- The caravan or trailer is completely immobilized and impossible to tow.
- Includes integrated remote control and alarm.

Truma VarioHeat eco: For vans and caravans

Buy Now \$1950.00

The Truma VarioHeat eco is an extremely compact and lightweight gas heater of the latest generation. It is very powerful and heats your vehicle to the required temperature very quickly. Thanks to the various functions, you can always set the heater to your precise requirements.

- Powerful caravan heater with two output levels.
- Automatic regulation of the heating output depending on the set temperature.
- Lightweight, requires little space.
- Even heat distribution in the vehicle via air outlets.
- Exact setting of the required room temperature.
- High air throughput for very quick heating.

If you want the vehicle to heat up quickly, you can use the boost function. You can select the night mode on the Truma VarioHeat eco to operate the heater at the lowest level in its 1300 Watt mode so you can sleep.

You can not only use the digital control panel Truma CP plus VarioHeat to operate the heater; you can also use it to control an installed Truma air conditioning system.

The Savvy Level Device

Level Your Van In Minutes With Ease!

Supplied — \$295.00

[Buy Now](#)

SavvyLevel is a complete integrated remote levelling system designed for caravans, campers, 4WDs and RVs.

The small SavvyLevel hardware device is fixed into the van or vehicle. This device uses its own sophisticated internal mathematical algorithms under real time execution by the command of the main micro-processor.

SavvyLevel reports both the pitch and roll to the user's SMART device with a precision of 0.1 degree. Each SavvyLevel unit is individually thermally calibrated to maintain that precision over the full operating temperature range. SavvyLevel also reports compass bearing relative to the vehicle or van in which it is placed.

Features:

- Simple to install & operate
- Precision to 0.1 degrees and maintained over the entire operating range.
- Real time leveling information is remotely reported to your SMART device
- Real time compass bearing is remotely reported to your SMART device
- Pitch and roll graphic and numerical indicator gauges
- 10x Zoom feature available for precision leveling
- Magnetic compass indicator relative to the vehicle, so you will always know where the sun rises and sets
- Day and night viewing modes
- For Android v4.3.1 (Jelly Bean) or greater
- For iPhone®, iPad® 4 or newer models
- Auto connection when device is within range
- Encrypted data transmission
- User customization device name and passkey
- Factory default reset
